

Thiamin·E

Catalog # 10112

(Piscivore vitamin supplement)

For Animals That Eat Raw Fish

(Available at our TestDiet Unit (765)966-1885/info@testdiet.com)

Description

Thiamin·E is a blend of vitamins specially formulated for animals whose diet consists mainly of raw fish. The product is guaranteed to provide 100 I.U. d-alpha-tocopheryl acetate (natural-source vitamin E) and 50 mg thiamin per ml. Other vitamins include pyridoxine, riboflavin, folic acid, and biotin in a paste formulation. There is no vitamin A in the product.

Feeding Directions

Administer **Thiamin·E** at the rate of **1 ml per kg raw fish to provide 100 I.U. vitamin E and 50 mg thiamin per kilogram**. Each cartridge can fortify up to 80 kilograms of fish. Since the product is in a paste formulation, it can be easily administered either into the mouth or gills of whole fish or mixed into sliced or chopped fish prior to feeding. Higher doses may be administered as required.

Standard Packaging

Thiamin·E is supplied in 80 gram recyclable cartridges which attach to a GENESIS automatic syringe that allows accurate repeat delivery of 1 to 5 grams(ml) with a single setting. The automatic syringe is also available.

Handling And Storage

Thiamin·E should be stored at room temperature or under refrigeration. Avoid excessive heat.

To Order

Thiamin·E is available through our TestDiet® Unit - (765)966-1885 or testdiet@purinamills.com.

Accurate Delivery System

The unique delivery system for Thiamin·E allows for flexible and accurate administration of the product. The product may be administered more precisely compared to tablet supplementation. Furthermore, the product is a paste which allows it to be mixed with chopped fish, or administered into whole fish prior to feeding. The repeating syringe allows accurate administration of the product to various species of piscivores.
