

**Description**

Mazuri® Koi Platinum Wheat Nuggets is a floating, highly digestible and nutritionally complete and balanced wheat-based diet. The diet is designed for koi in ponds, tanks and aquariums and is formulated to provide complete nutrition in one product, with special ingredients added to provide pigmentation.

**Features and Benefits**

- **Highly digestible.**
- **Complete nutrition** - No supplement needed.
- **Contains spirulina algae** - Provides source of pigmentation.
- **Contains a high level of stabilized vitamin C** - May help resistance to stress.
- **Highly palatable** - Fish will eat it readily.
- **Floating particles** - Fish can be observed eating.
- **Contains wheat germ** - Favored by many koi feeders.
- **Contains only natural vitamin E.**

**Product Form**

- Extruded particle - 5/32" x 5/32" length. 20 lb. net weight paper sack.  
*Also available in a 2.5 lb Mini-Pack - 5MM4*

**Catalog #**

0060561

**Guaranteed Analysis**

Crude protein not less than ..... 31.0%  
 Crude fat not less than ..... 4.0%  
 Crude fiber not more than ..... 5.0%  
 Phosphorus not less than..... 1.0%

**Ingredients**

Ground wheat, dehulled soybean meal, fish meal, wheat middlings, wheat germ, fish oil, shrimp meal, dehydrated alfalfa meal, salt, L-ascorbyl-2-polyphosphate (source of vitamin C), brewers dried yeast, spirulina algae meal, dicalcium phosphate, monocalcium phosphate, betaine, biotin, choline chloride, vitamin A acetate, d-alpha tocopheryl acetate (source of natural vitamin E), cholecalciferol (vitamin D<sub>3</sub>), calcium pantothenate, pyridoxine hydrochloride, tagetes extract, menadione dimethylpyrimidinol bisulfite (source of vitamin K), canthaxanthin, cyanocobalamin (vitamin B<sub>12</sub>), ethoxyquin (a preservative), thiamin mononitrate, nicotinic acid, folic acid, DL-methionine, riboflavin, astaxanthin, beta carotene, manganous oxide, zinc oxide, ferrous carbonate, copper sulfate, zinc sulfate, calcium iodate, cobalt carbonate, sodium selenite.

**Feeding Directions**

Feed to koi in ponds or tanks as a floating feed to fish six inches or longer. Feed only as much as fish will readily consume. Do not over feed as excess feed will decompose in the water, resulting in poor water quality, which in turn can be harmful to the health of the fish.

Average weights may be used as a general guideline. However, we always recommend weighing diets to ensure proper intake as individual particle weight may vary.
