

Description

Mazuri® Papaya Tablet is a highly palatable papaya melon tablet which includes added papain, a proteolytic enzyme. Papain may aid the process of hair passage in animals susceptible to hair accumulation in the gastrointestinal tract.

Features and Benefits

- **Highly palatable to all animals**
- **Aids in elimination of hair balls**
- **Provides treat to the animals**

Product Form

- Oval-shaped tablet: 6 mm (1/4") thick x 16 mm (5/8") long x 10 mm (3/8") wide
- Each tablet weighs 0.6 grams
- Available in three canister sizes:

300 tablet canister	9262	Catalog #0007501
1500 tablet canister	9256	Catalog #0007495
3000 tablet canister	9257	Catalog #0007496

Ingredients

Maltodextrin, dried corn syrup, cellulose, fructose, soybean fiber, papaya melon, magnesium stearate, ascorbic acid, papain, vanilla flavor.

Feeding Directions

Follow the recommendations of a veterinarian who is familiar with the animals showing the effects of hair balls. Feed 2-3 tablets daily to an average size animal (4 kg). Adjust feeding rate according to the animal size and difficulty of problem. After feeding the tablet(s), observe the animal daily for passage of hair in the feces. When hair has passed, discontinue the tablets until further evidence of ingested hair is indicated. If hair balls continue to be a constant problem, feed a tablet(s) daily for 3 consecutive days or until hair passes, then discontinue for 7 days. Repeat as necessary to control the hair ball problem.
