

## CHOOSING THE BEST ALPACA DIET

Choosing the best alpaca diet is based on the lifestage (e.g., growing, reproducing or maintenance) and lifestyle (e.g., showing or pleasure animal) of your alpaca. Each MAZURI® diet was designed in conjunction with a leading alpaca veterinarian and nutritionist, Dr. Norm Evans. All have been tested for palatability. Always provide plenty of clean, fresh water, and test your hay and/or pasture regularly to ensure that animals are receiving appropriate nutrition. For more information on any of these diets, consult the detailed spec sheets at [www.mazuri.com](http://www.mazuri.com) or contact a Customer Service representative.

LIFESTAGE & LIFESTYLE	RECOMMENDED DIET	DESCRIPTION	DAILY FEEDING DIRECTIONS*
<b>Growing cria</b>	<b>Alpaca Growth &amp; Repro - 56CD</b>	Coarse sweet feed	0.33 - 0.50 lb per 50 lb body wt
