

CHOOSING THE BEST LLAMA DIET

Choosing the best MAZURI® llama diet is based on the lifestage (e.g., growing, reproducing or maintenance) and lifestyle (e.g., showing or pleasure animal) of your alpaca. Each of these diets were designed in conjunction with a leading llama veterinarian and nutritionist. All have been tested for palatability. Always provide plenty of clean, fresh water, and test your hay and/or pasture regularly to ensure that animals are receiving appropriate nutrition. For more information on any of these diets, consult the detailed spec sheets or contact Customer Service.

LIFESTAGE & LIFESTYLE	RECOMMENDED DIET	DESCRIPTION	DAILY FEEDING DIRECTIONS*
Growing cria	Llama High Fiber - 5631	Pellets	0.5-1.0% of body wt
Maintenance (not breeding/showing)	Llama Chews- 5MI7	Mini-cube	0.25-0.50 lb per 100 lb body wt
	Llama Crumbles - 5MKB	Crumbles	
	Llama Alpaca Maint - 561J	Pellets	
Breeding females	Llama High Fiber - 5631	Pellets	Free choice for 30-60 min/day; 1.5% of body wt.
Lactating females	Llama High Fiber - 5631	Pellets	Free choice for 30-60 min/day; 1.5% of body wt.
Show animals	Llama High Fiber - 5631	Pellets	Free choice for 30-60 min/day; 1.5% of body wt.
	Fiber Enhancer - 56DJ	Vitamin/mineral blend	Top dress feed at 2 oz per day

* Always provide free choice grass hay or pasture. DO NOT FEED TO SHEEP due to levels of copper. Diets are designed to complement forages containing 4 to 15 ppm Cu.
